

AUTOLUCIDANTE

Self-polishing

Autolucidante is an acrylic-based product which forms an adherent, strong, perfectly transparent film on surfaces that remains stable even when exposed to UV light (will not yellow on exterior application). It creates a bright, polished surface even good for the difficult areas such as ridges, corners, edges, and touch-ups, etc.

FUNCTION Solvent-based self-polishing product.

INDICATIONS Protects and shines treated surfaces, makes a polished shine possible even in the most difficult areas.

COMPOSITION Mixture of natural and synthetic polymers in organic solvents.

MATERIALS Especially designed for marble; recommended for all types of porous materials.

USAGE

1. Apply on clean and dry completely dry surface with brush or cloth. Using stroking motion to promote maximum penetration and to avoid accumulation.
2. After drying, a second coat may be applied to identify the desired effect.
3. To bring out the best shine, when the surface is completely dry polish, using a buffing machine with wool felt pads.

NOTES

1. Dries in 5-30 minutes. (depending on ambient conditions and types of materials).
2. Solvent-based product. Wearing gloves is recommended, work area should be well-ventilated.
3. A preliminary test on a small part of the surface is suggested.
