TOR43 ORBITAL SINGLE DISC MACHINE

Whatever is your cleaning need TOR43 is the solution:
suitable for any type of application and comfortable for any user

TOR43 is a new concept single disc machine recommended for heavy duty works. It has an orbital movement that enhances the performances of a regular single disc machine.

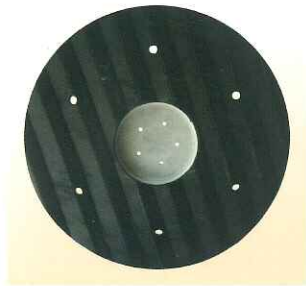

The high frequency oscillations get stability and manoeuvrability even with a weight of 65 Kg (without accessories). In treatments that require water TOR43 ensures a remarkable saving, since water is constantly kept under the disc area through the orbital movement and is not sprayed around.

Moreover, the particular orbital movement makes its use very easy for any operator, that has not necessary to be endowed with distinctive physical strength, reducing also training time.

The low current absorption of this machine means that it can even be used together with a vacuum cleaner, with both appliances powered by standard mains voltage.

OPTIONAL PAD HOLDERS

Different pad holders allow to properly set TOR43 according to the type of work to carry out

Pad holder with Velcro strips

The Velcro strips are fixed onto a soft surface, to allow the pad to follow the treated surface more effectively. It is suitable for floor maintenance and polishing.

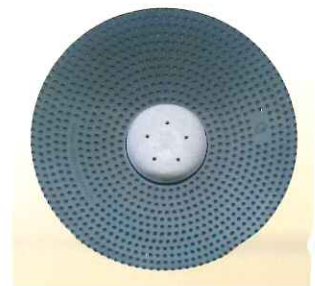

Velcro pad holder

The entire surface is covered with Velcro, ensuring more resistance in case of high friction. It is suitable for heavy duty pads, for deep cleaning of hard floors and moquette.

Pad holder for sandpaper

It is suitable for abrasive pads used for stone and wood treatments and tungsten pads, employed on concrete surfaces.

Pad holder for steel wool

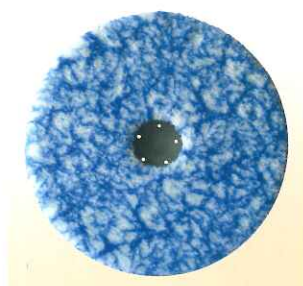

The rubber surface is suitable for crystallization with steel wool pads. Its particular shape save steel strings to get caught on the Velcro.

ACCESSORIES

A wide range of pads and accessories ensures to get the best results according to the type of floor and treatment.

Abrasive pads

Microfiber pads

Steel wool pads

Spray kit for moquette cleaning

TOR43 is suitable for heavy duty cleaning, stripping, crystallization, polishing and honing of marble, stone, cement and wood floors.

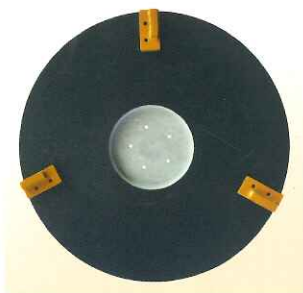

Diamond pads - TMB SHINEPAD

They are suitable for marble and derivatives, both for maintenance and restoration of worn out floors. 9 grits are available from 50 to 15.000, allowing treatments from roughing to high gloss polishing

An example of gres floor (non- ceramic) before and after the restoration

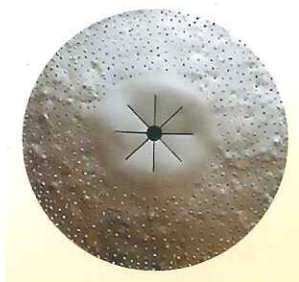

Diamond-coated metal grinding discs

Placed on the pad holder they remove very deep scratches as well as height differences in the laying of marble floors.

They are available for both concrete and marble, with 3 different grits according to the type of treatment to be carried out

Example of usage on marble surfaces, from roughing with diamond-coated metal grinding disc to high gloss polishing with TMB SHINEPAD disc

Disc with electrodeposited tungsten coating

TOR43 can be used for heavy duty applications, to restore worn out surfaces, to remove products such as resins and glues, to prepare subfloors or surfaces for resin treatments

TECHNICAL DATA		TOR43
Drive		Direct
Working width	cm	43
Brush Ø	cm	43
Pad holder Ø	cm	43
Oscillations per minute	n.	1400
Power supply	V/Hz	230/50*
Tank	l	15
Power	W	1100
Machine weight	Kg	65
Machine dimensions (L x h x w)	mm	700x1220x495

* V/Hz 120/60 is also available
