

DDA STRONG ACID DETERGENT

DDA is a detergent with extremely fast acidic action. Removes calcareous layers and other mineral deposits. Excellent for the removal of construction yards dirt in general, quickly removes build-up residues and saline encrustations.

FUNCTIONS

Descaling acid detergent

INDICATIONS

Recommended for the removal of any calcareous encrustation (Efflorescence, water marks, excess cement, etc.) Works well on rust.

MATERIALS

Natural stones, glass, ceramic tiles, gres porcelain tiles, concrete.

USAGE

1. Under normal conditions, use in a 10-20% dilution in water (1-2 liter of DDA in 10 liters of water). In severe cases may be undiluted. Let the product work and rinse well by clear water.
2. To neutralize residual acidity, add a small amount of neutrex to the rinse water.

NOTES

1. This product is strong acid detergent, wear impermeable gloves and protective eye-wear. Keep out of the reach of children.
2. Protect carefully the surrounding objects or surface sensitive to the acids such as metal, wood etc. Because the product will be spread through the air.
3. Plastic brushes can be used for optimal cleaning results. Do not use on surfaces that are sensitive to acids such as polished marbles, anodized aluminium etc. (acid products will remove the polish).
4. A preliminary test on a small part of the surface is suggested.
