

Protective Floor Guardian Hammerproof - item number VRH25-1PET

Our protection-mat HAMMERFEST is a high density thermally fixed RCF existing weight of 850 gr. / m², nonwoven fiber mat. This product allows the user to have an extremely high traffic base floors and surfaces against high mechanical effects such as frames, hand lift trucks and other heavy traffic or impact on shooters. His hard and robust nature, gives the processor the advantage that VRH25-1 can be installed with little effort on large areas to move quickly and easily on the surface while protecting lasts save and as long as needed.

- very strong, hence very high durability and drivable for truck / car / frames
- Very high mechanical protection
- Cost savings through reuse and simple, fast installation
- 100% breathable / open for diffusion
- very high punch through tensile strength, very light handling with a cutter or scissors to get mat in right shape to fit everywhere
- „Made in Germany“

Our protection is a laying-to-the-ground mat. HAMMERFEST rolled out in tracks side by side and fixed with adhesive tape to be connected to each other, corners and angles, on the ground it is easily to cut with a cutter or scissors. A full-scale protection of all types of surfaces formed in the interior.

Technical Data:

- Material: 100% pre-washed and recycled fibers with ultra-high temperature melting fiber supplement Polyethylenterephthalat
- Dimensions: 25m x 1m roll, 9 pcs. /pallet
- Weight: Grammatatur 850gr/m²
- Color: black / dark colored
