

**GRUNDSCHUTZ**

Pre-impregnating  
basic protection

M.V.F. FOERG

System care in accordance with the Formanek method  
(patent no. AM 2291/99, reg. no. 187762)  
for natural and cast stone.  
Cleaning - Protection - Care  
Hydrophobizing - Oleophobizing - Acidophobizing

### Technical data sheet

<b>Description</b>	<p><b>GRUNDSCHUTZ</b> pre-impregnator was especially developed for rough and very porous materials. It is ideal for interior and exterior application to all kinds of stone - except for any type of slate.</p> <p><b>GRUNDSCHUTZ</b> pre-impregnator is dirt- and water-repellent and therefore best suited to be applied during the laying process:</p> <p>If the product is applied before laying the stone, it prevents cement blurs and protects against stubborn soils and jointing material residues. And what is more, treating the undersurface of the stone slabs prevents the formation of so-called "water stains".</p> <p>We recommend the treatment with <b>GRUNDSCHUTZ</b> pre-impregnator when the stones are still moist.</p>
<b>Application</b>	<p>Use a soft roller or brush to evenly apply <b>GRUNDSCHUTZ</b> pre-impregnator to the absorbent and clean surface. Before applying <b>GRUNDSCHUTZ</b> pre-impregnator, the treated surface should be cleaned with <b>KRISTALLREINIGER</b> cleaner for brilliant shine.</p> <p><b>Important:</b></p> <p>Make sure that all adjacent surfaces of glass, polished material, plastic, stainless steel and aluminium as well as furniture etc. are carefully covered. Switch off the floor heating.</p> <p>For the treatment of slate, we recommend our <b>NATURSTEIN-TIEFENIMPRÄGNIERUNG</b> (deep-impregnator for natural stone).</p>
<b>Consumption</b>	1 litre for approx. 10 to 15 square metres, depending on the absorbency of the stone.
<b>pH value</b>	14
<b>Delivery lot</b>	Bottle of 1 litre Container of 10 litres

**Important note** Full performance and effectiveness of **GRUNDSCHUTZ** pre-impregnator is only granted if the cleaning and care products required by the "Formanek method" are used before and after the treatment.

**Safety** Provide for good ventilation during the use of the product.  
Once the treated surface is completely dry, **GRUNDSCHUTZ** pre-impregnator does not cause any risk to human health.  
Wear protective gloves and eye protectors.  
For further information, please refer to the safety data sheet.

**Storage** Keep the product container tightly closed.  
Keep the product inaccessible for children.
