

## R69 GRANITE DIRT REMOVER

### R69 GRANITE DIRT REMOER

R69 granite dirt mover is a colourless liquid composed with a decisive acid reaction. It is the utmost and good oxidizing cleaner. The product is stable and active at temperature between 5°C to 35°C. It can get into the stone pore and remove the neutralize the rust, metallic oxides, impurities and foreign substances in the stone-underling the original esthetic characteristics of the stone. It does not leave any coloured halos or insoluble residues.

**FUNCTION** Deep cleaning and acidic detergent for removal of yellowish and rusty in granite.

**INDICATION** It is acidic deeply detergent.

**MATERIALS** Particularly suited for granite and non-acidic sensitive material.

**USAGE** Protect the eventual parts in metal, wood or other materials which are not considered resistant to the product reaction.  
Wet the surfaces with synthetic brush  
Leave to act for 1-2 hours. Rinse with clean water. In most difficult cases, allow product to work for a longer period of time or repeat application.

**NOTES** Protect hands and eyes by wearing gloves and protective eye-wear. Keep out of the reach of children  
Do not use on surface that are sensitive to acid (on polished marble, acid will remove the polish)  
A preliminary test on a small part of the surface is suggested.
