### AGEING/ANTIQUING ACID FOR MARBLE AND CALCAREOUS STONES

It is a product with quick and strongly acid reaction making a homogenous, permanent and **irreversible** corrosion of the calcareous surfaces, polished too, without making any kind of whitish halo or mark. After rinsing, the treated material is perfectly renewed, natural and free from any alien chemical component.

The surface aspect (like "orange skin") shows an old fashion shade of ancient taste and enhances the natural texture of the treated marble. With the surface roughened like that the slipperiness of the materials is highly reduced.

Because of the higher porosity, if compared to polished materials, it is suggested a following treatment with oil or/and water repellent sealers to reduce the capacity of the material to absorb and to get stained.

<b>FUNCTION</b>	CHEMICAL SATINIZING OF MARBLE AND CALCAREOUS STONES
<b>LINE</b>	FINISHING <span style="float: right;">PROFESSIONAL</span>
<b>INDICATION</b>	FOR THE CHEMICAL SATINIZING OF ANY KIND OF CALCAREOUS STONE. IT BRINGS AGAIN TO LIGHT THE ORIGINAL STRUCTURE OF THE MATERIAL. TO HAVE A HOMOGENEOUS SUPERFICIAL ASPECT, LIKE "ORANGE PEEL", AND A DEEP AND TOTAL CLEANING OF THE MATERIAL. WHEN USED ON POLISHED MATERIALS IT REMOVES IN IRREVERSIBLE WAY THE ORIGINAL SHINING OF THE MATERIAL.
<b>MATERIALS</b>	MARBLES AND CALCAREOUS NATURAL STONES
<b>HOW TO USE</b>	THE PRODUCT IS READY-TO-USE, DO NOT DILUTE. APPLY ON THE SURFACE TO BE TREATED TAKING CARE TO PROTECT THE SURROUNDING AREA AND MATERIALS. SPREAD IN EVEN LAYER/COAT AND LET IT WORK; THE PRODUCT SHOWS ITS ACTION GENERATING AN INTENSE WHITE MICRO-FOAM. BY REACTING WITH THE STONE, THE PRODUCT WORN OUT GRADUALLY AND REDUCES ITS ACTIVITY. LET THE PRODUCT WORK 10-15 MINUTES LONG, THEN RINSE BY CLEAR WATER. TO HAVE A MORE INTENSE EFFECT, THE APPLICATION CAN BE REPETEAD MORE TIMES.
<b>TEST</b>	Always effect a preliminary test on a small part of the surface to evaluate the activity of the product on the surface and to determine the number of the eventual further applications.
<b>COMPOSITION</b>	THE PRODUCT CONTAINS: SURFACTANTS BIODEGRADABLE >90%, MINERAL ACIDS, COADJUVANTS, CORROSION INHIBITORS. ACTIVE SUBSTANCE >60%
<b>TECHNICAL DATA</b>	THE CONSUMPTION IS ACCORDING THE REQUIRED EFFECT. IF NEEDED, REPEAT THE APPLICATION MORE TIMES.
<b>LIMITATION OF RESPONSIBILITY</b>	The data provided derive from published information or from our own laboratory tests. The information provided here have to be considered as a guideline and not as any form of performance guarantee. Liability for defective products, when verified, is limited to refund of the purchase price since the application of the product is beyond the control of the manufacturer or supplier.
<b>NOTE</b>	ACID PRODUCT: ALWAYS WEAR IMPERMEABLE GLOVES AND SEFETY GOGGLES. MORE INFORMATION CONCERNING SAFETY CAN BE OBTAINED FROM THE LABEL OR THE MATERIAL SAFETY DATA SHEET
<b>IMPORTANT</b>	<b>BOXER 24</b> IS AN ACID PRODUCT THAT REMOVES THE GLOSSY IN IRREVERSIBLE WAY FROM CALCAREOUS STONES AND METALS (POLISHED MARBLES, ANODIZED ALUMINIUM etc.) <u>NEVER USE THE PRODUCT ON POLISHED OR/AND SHINING SURFACES IF YOU DO NOT WANT OR DO NOT LIKE ITS SATINIZING ACTION.</u>

**ALWAYS EFFECT A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA BEFORE THE APPLICATION**
