

## MAGICAL RUST REMOVER

For use on tough metal rust stains and heavy build up found on Marble, Granite, Aluminum, Stainless steel, Concrete, and Ceramic tiles.

### HOW TO USE

1. Apply Magical Rust Remover to target area and spread evenly over surface using an appropriate tool. The coated area should begin to turn purple as remover penetrates surface to get at rust.
2. Allow time for Magical Rust Remover to penetrate surface and break down rust. For normal rust stains average waiting time is 5 ~ 15 minutes. On deep stains or heavy build up more time may be necessary.
3. Wipe excess with towel and rinse area thoroughly with water and dry if possible. Purple color is water soluble and will not stain the surface.
